DETAILED ACTION

Election/Restrictions

1. Applicant's election of group I, claims 1-11, in the reply filed on 11/20/2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 12-25 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Oath/Declaration

3. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.
4. The oath or declaration is defective because:

It does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR 1.56.

Specification

5. The disclosure is objected to because of the following informalities:
 - second occurrence of "to move" on page 5, line 19, should be deleted.

Appropriate correction is required.

Art Unit: 3721

Claim Objections

6. Claims 6, 8 & 11 is objected to because of the following informalities:

- “EDP” on line 3 of claim 6 & claim 8 should be spelled out.
- The phrase “one of the” on line 1 of claim 11 should be deleted.

Appropriate correction is required.

Drawings

7. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 17 & 18 on page 10, lines 15 and 16, respectively. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

- With respect to claims 2 & 3, the order in which the diagonal score line is produced before or after with respect to the longitudinal and transverse score lines depends greatly on the complex of the scoring indicia (26) which may include curve or straight lines, some may be scored before the other and vice versa; therefore, the order of the diagonal score line with respect to the longitudinal and the transverse score lines is anticipated by the method of Baron.

Art Unit: 3721

- With respect to claim 4, the score lines are produced by a scoring head (94) which a cutter.

- With respect to claim 8, the movement of the dispensing head (5) must be in accordance with a programmed sequence (col. 2, line 64 – col. 3, line 8), which inherently included in the method of Viggiano a computer for digitally control the movement of the dispensing head.
- With respect to claim 9, the dispensing head (5) is fully capable of being activated pointwise based on the programmed sequence.

Art Unit: 3721
